

## Plant Quality Manager

Taylor, TX

**Job Summary:** Manages inspection activities in home facility, and controls inspection articles and materials to comply with established standards of quality. Coordinates the application and viability of various kinds of gauges, electrical and non-electrical measuring instruments, testing apparatus/software and equipment for confirming product conformance to electrical and mechanical specifications. Will maintain compliance with Basler's ISO Certified Quality Management System. Assures acceptable quality levels are maintained throughout the manufacturing process.

**Reports to:** Quality Assurance Manager

- Essential Duties:**
- Generates quality plans for new and existing products manufactured in home facility.
  - May supervise more than one shift, and, in many instances, more than one area of the plant, which may include more than one department.
  - Supervises the receiving inspection, in-process inspection and out-of-box audit areas.
  - Provides input to engineering for product development process by participating in design review.
  - Interprets specifications, appropriate standards, provides inspection methods and reviews manufacturing processes and documentation to ensure a quality product.
  - Coordinates test set-ups employing proper test equipment and instructs people on the proper methods of operations to assure compliance to specifications.
  - Coordinates failure analysis to determine root causes and initiates corrective actions to eliminate root causes of nonconforming products.
  - Assures that all quality records of inspection and tests are properly recorded and generates quality reports needed to monitor facility performance.
  - Audits calibration status of test equipment and provides support to calibration personnel during the calibration process.
  - Provides analysis and technical assistance to manufacturing, marketing, customers, and suppliers as required to solve problems that affect product quality.
  - Communicates with customers and suppliers through travel, telecom and other means including visits when appropriate.
  - Operates as lead internal auditor for home facility.
  - Monitors facility quality performance and initiates corrective and preventive actions when appropriate.
  - Reviews design verification and acceptance test documentation for completeness.
  - ECO approval/review/implementation.
  - Prepares and chairs annual Management Reviews.
  - Prepares information for quarterly Preventive Action Meetings.
  - MRB team Quality representative.
