

Application Engineer - Excitation

Highland, IL

- Job Summary:** Provide systems application engineering to sales and customers utilizing technical knowledge and expertise from areas of specialization.
- Reports to:** Regional Sales Manager - Power Generation
- Essential Duties:**
- Assist customers in the proper selection of Basler products as they relate to systems as well as to discrete components.
 - Assist customers in the application, installation, start up, calibration, troubleshooting, and problem solving of Basler products and related systems.
 - Travel, as required, to determine product potentials and customer needs and assist in the sale of products and systems.
 - Maintain proper communication with all sales territories to ensure systems application assistance is provided as may be required in sales plans.
 - Present Basler products, systems, and problem solutions to customers at conferences as scheduled by sales personnel.
 - Assist in promotion activities including product literature reviews and industry functions such as trade shows, technical conferences, and schools.
 - Actively participate in interfacing and communicating with marketing personnel and project teams to provide market feedback for successful product specifications and development.
 - Survey and define market needs.
 - Assist in market research and competitive information collection, as required.
 - Present technical papers at industry conferences, as required.
 - Assist in creating sales tools including application notes.
 - Lead other application specialists in daily activities.
- Requirements:**
- BSEE or equivalent experience.
 - Minimum five years' experience as Application Specialist - Systems, or ten years equivalent experience and working knowledge of generating power systems and analog and digital circuitry.
 - Willingness to travel at least 50% of time in assigned sales territories.
